2016 Regional Conservation Partnership Program
West Fork White River Watershed Project

The Regional Conservation Partnership Program (RCPP) is a new, comprehensive and flexible program that uses partnerships to stretch and multiply conservation investments and reach conservation goals on a regional or watershed scale.

Project Overview

The West Fork White River Watershed RCPP Project is a voluntary program that provides financial and technical assistance to agricultural producers for addressing water quality concerns in approximately one-third of the West Fork White River Watershed including Dye Creek, Rock Creek, West Mountain Branch and Ward Slough sub-watersheds in a portion of Washington County.

Resource Concerns Addressed by the Project

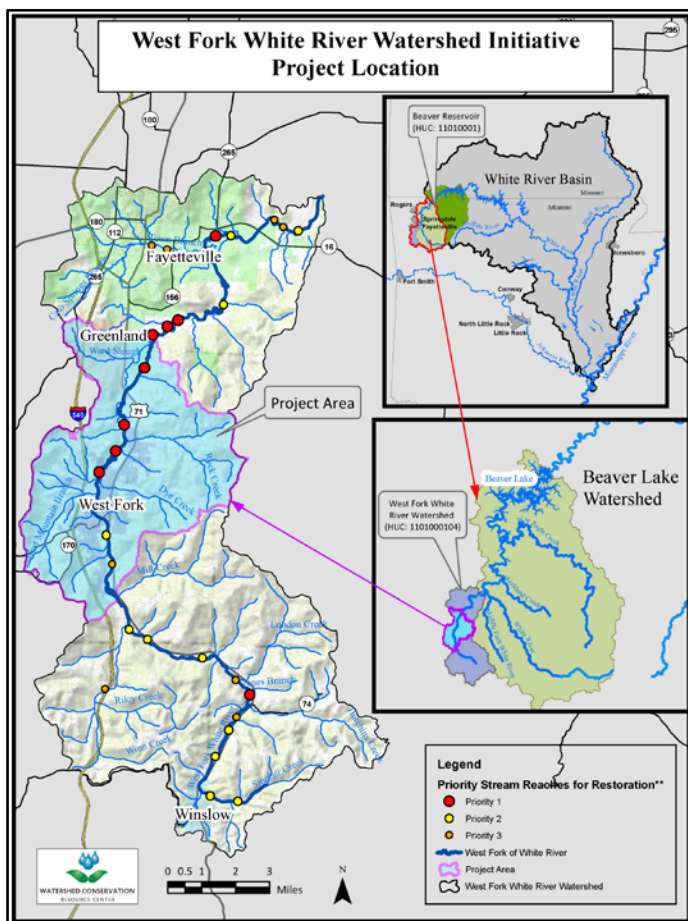

- Water Quality (primary)
Inadequate Habitat for Fish and Wildlife Habitat (secondary)

Project Goals

- Address critical watershed-scale erosion and improve water quality, riparian areas and aquatic habitat through the design and construction of large-scale river restoration
Address accelerated streambank erosion and implement best management practices on pastures and forestland

Conservation Practice Funding

Funding will be available to eligible landowners through the Environmental Quality Incentives Program (EQIP). NRCS will provide financial assistance for a systems approach using approved conservation practices for the purpose of addressing resource concerns. Land and producer eligibility, adjusted gross income, and all

other program criteria for participation must be met to participate in this initiative. Agricultural lands are eligible for enrollment in the initiative.

Approved Conservation Practices

- 313-Waste Storage Facility
316-Animal Mortality Facility
327-Conservation Cover
332-Contour Buffer Strips
338-Prescribed Burning

## PL-566 Funding

The RCPP project is also receiving funding through the PL-566 Program. PL-566 funding is provided to the partners to address critical streambank erosion sites. A comprehensive watershed plan will be developed to identify key sites for streambank stabilization projects. Funding provided by NRCS and the partners will fund the construction of these projects.

## How to Apply for RCPP

NRCS and associated conservation partners will deliver this program collaboratively. Applications may be obtained and filed with NRCS at:
